Why Us?

The opportunity to visit our factory in Wrocław: Seeing the production process of our doors live, gives you a full picture of what we do and how we do it. You can see for yourself with what accuracy and attention to detail we make our doors.

Free expert advice: by using our services, you have access to expert knowledge to help you make the right decision. This ensures that you are choosing the best solution available.

Standardised sales process and T&Cs: A simple and clear ordering process provides comfort and saves time. All arrangements are clearly defined so you know what to expect at every stage.

We value your time. That's why we carry out valuations within 48 hours of receiving your enquiry. This allows you to make quick project decisions and plan your budget efficiently.

Online valuation calculator: performing an initial valuation yourself gives you control over the process and allows you to assess costs without having to contact our representative. Our tool saves you time and enables quick price verification.

We will answer your questions in 24 hours. Our reactivity is a guarantee that your doubts will be resolved quickly, eliminating unnecessary errors and delays in the project.

Within 48h after obtaining the measurements, you will receive a preview production documentation for approval. This ensures that the final product is in line with your ideas and avoids errors and delays.

We provide the flexibility to refine the design to meet your expectations. You can be sure that the final design will be exactly what you want.

If you want to install the door yourself, we will support you with knowledge at every stage, from preparing the opening to measuring and installation. In addition to clear instructions on paper, we also offer consultations with our experts. You will be assured that you are doing everything right and will avoid mistakes

What is the process?

To get started, send us your design, visualisation and the dimensions of the door opening. Our sales specialist will contact you by phone to discuss all the necessary details and prepare an accurate quote

If you accept the quotation, we will send you the order confirmation along T&C and proforma. All our documents can be signed online so no need to print them.

Send us exact measurements.

Knowing the exact dimensions, we can produce technical drawings of your order. Once these are accepted and the order is signed, the door is sent to production. Please note that after this stage it is no longer possible to make changes. From this point onwards, we count the delivery time of your order.

Doors are welded to individual orders. If required, you can find out about the progress of the work by contacting us directly.

Each product passes through our quality control department. Once this stage has been successfully completed, we contact you to arrange an assembly or delivery date.

Doors are fitted or delivered at a previously agreed time.

After installation or delivery, we do not end our cooperation. We are at your disposal in case you have questions or need consultation.

POZNAJ

ICON LOFT

1 A wide range of systems:

We offer six unique loft door systems that differ in terms of both style and functionality. Thanks to the diversity of our range, you don't have to limit yourself to just one solution, you have a choice and don't waste your time searching through many different manufacturers.

2 Diverse technological and design options

Each of our systems offers unique technical and design features. As a result, we have no design limitations. If something cannot be made in one system, we can offer another, thus eliminating the risk of later disappointment when something does not work properly or the end result is not satisfactory. Our flexibility and versatility ensure that our doors not only look gorgeous but also meet the customer's specific needs and expectations.

3 Variety when it comes to stiles:

We offer systems with a variety of muntin solutions - from structural to stick-on, as well as muntin-free systems. which addresses the need to customise the appearance of the door to suit the interior. The choice of muntin bars is not only an aesthetic choice but also a decision about the form of glazing or the frequency of dust wiping.

4 The unique style of each system:

Each of our loft door systems has its own unique style, making it a perfect fit in certain spaces. There is no need to compromise between appearance and functionality. Depending on the chosen interior style, be it industrial, modern or elegant, there is a suitable system that fits in perfectly. In this way, our doors are not just a functional element, but also a key decorative accent that emphasises and completes the entire interior.

INDUSTRIAL RAIL

This is our original creation, which stands out in the market for its uniqueness and originality. The large steel wheels roll on a solid steel track. The caster attachment offers built-in height adjustment for the door suspension. The distinctive sound when sliding gives it an authentic feel and it is worth noting here that it is not a completely silent system. It also has no self-closers, which emphasises its raw, industrial character.

MODERN RAIL

The aluminium guide, guarantees the doors a quiet and light operation. Its minimalist design blends in perfectly with modern interior aesthetics. What is more, the system provides the possibility to adjust the height of the door suspension and offers dedicated grilles, caps and spacers perfectly matching the skirting boards. In addition, the system allows the installation of brakes and self-closing devices.

GUIDE

All sliding doors, regardless of the system chosen, benefit from a bottom track guide. Its small and unobtrusive form is the perfect alternative to long floor guides, which are the ideal place for dust and hair to accumulate. The point guide keeps the floor intact and the sliding doors operate stably and safely. Teflon glides ensure smooth sliding and protect the door from scratches.

SYSTEM: LOFT LITE
colour : 9005 MAT
Glass : wired
Pull handle 3

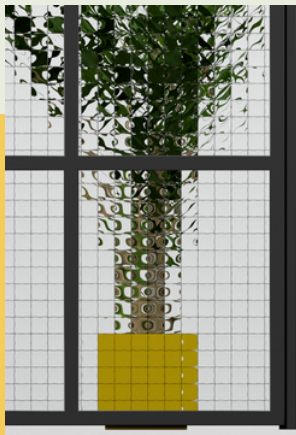

CLEAR

- available as either laminated or toughened option
- also available as optiwhite

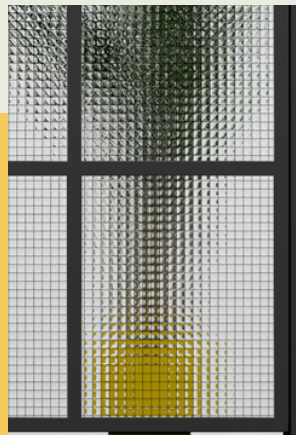

ANTISOL

- toughened
- thickness **bronze or graphite** 4-10mm

Colours and textures

Powder coating is a durable and efficient finishing technique that creates a barrier between the surface of the steel and the outside elements, preventing moisture penetration and oxidation of the metal. The result? Doors that retain their structural integrity and aesthetic appearance for a long time.

To meet the diverse preferences of our customers, we offer a wide range of colours from the renowned RAL palette. RAL colours provide a wide selection of shades, allowing you to find the perfect one to match your aesthetic requirements for your project. Whether you are looking for something classic and timeless or a bold, modern expression, our collection is for you.

At our company, we understand that every project is unique and finding the perfect colour is essential to achieving the desired visual effect. That's why we go to great lengths to help our customers through the colour selection process. Our team of experts are always on hand to provide guidance and work with you to identify the perfect shade to match the vision of your project and complement its surroundings.
