CORTIZO

GLOBAL PRODUCTION CAPACITY

CORTIZO, an international leader in the design and manufacture of aluminium and PVC. Our production capacity consists of 150,000 t of aluminium and 45,000 t of PVC. This enables us to meet the requirements of our customers across more than 80 countries in which we are currently present.

investigation, advancement and quality

CORTIZO IS QUALITY

The quality of all CORTIZO products is based on the strict tests carried out in official, national and international laboratories, as well as by our technical staff in our own test benches.

R+D

Design, innovation and quality are the protagonists in the more than 80 window, door, façade, composite panel, balustrade and solar protection systems designed by our R&D department. CORTIZO enclosures adapt to the climate and construction particularities of thousands of projects around the world. Single-family and collective housing, hospitals and health centres, hotels, administrative buildings, infrastructures, sports centres, commercial and industrial spaces, social and cultural centres...

The adequate selection of raw materials and the control of all parameters that influence the extrusion process, backed by the ISO 9001 international certification, guarantee the quality of the extruded material. Additionally, the meticulous work in the execution of the surface treatments has allowed us to obtain the most demanding European quality certificates, such as QUALICOAT, QUALIDECO and QUALICOAT SEA SIDE for the laquering process, and the EWWA-EURAS for the anodizing process.

CORTIZO LAB

The Cortizo LAB software allows for the immediate production of calculations, test results and classifications of all enclosure systems designed by CORTIZO and tested in its Technological Centre, for any dimension, typology and glazing (windows, doors, double joinery, façades, roofs and louvres).

Thermal performance
Acoustic performances
AEV Tests:
- Window and door systems: EN 12207 / EN 12208 / EN 12210
- Façades: EN 12152 / EN 12154 / EN 13116

Microventilation
Mechanical Calculations
Calculation and production of wind and snow load reports

CORTIZO BIM

Virtual management of enclosure designs
BIM training
Personalized assistance
BIM customized solution designs

Founded on the 3D reproduction of each of the structural elements that make up a building, this technology allows for a more quick and comprehensive parametric design of the projects, offering digital replicas of our enclosure systems. The BIM library incorporates intelligent objects that implicitly carry all the technical, thermal, acoustic and mechanical information, virtually reproducing their behaviour in reality.

TSAC NETWORK

Personalised technical assistance to architecture professionals in their own geographic working area is a differentiating fact of the CORTIZO spirit. For this purpose, we have a network of 22 Proximity Architecture and Engineering Departments strategically located in different areas in Europe and America.

Finite Element Method for Structural Computation
Documents of compliance with regulations and standards
Official tests and certifications from the CORTIZO Technology Centre
Design and assessment of customised profiles for each project
Resolution of details and meeting on site
BIM comprehensive assistance

CORTIZO ECOEFFICIENT

Aluminium life cycle “cradle to cradle”.
Via its two foundries, CORTIZO RECYCLING transforms aluminium waste into raw material for the extrusion of profiles, thus closing the cycle of a 100% reusable material.
More than 2400 pick-up points of aluminium scrap in Europe.
Low energy consumption in recycling (only 5% compared to primary consumption).
Officially certified purifying stations

enclosures

hinged window and door systems

COR 80

Industrial Passivhaus

Certified for the warm-temperate category, this system offers exceptional thermal insulation thanks to its special foams on the frame and sash. With a transmittance value Uw from just 0.66 W/m²K, it is an ideal solution for buildings with low energy consumption.

FEATURES

Transmittance	Uw ≥ 0.66 (W/m²K)
Acoustic insulation	Rw up to 46 dB
Air permeability	Class 4
Water tightness	Class E1950
Wind resistance	Class C5

Reference test 1.23 x 1.48 m / 2 sashes

COR 80

Industrial

With a 80 mm frame depth, the COR 80 Industrial series responds to the most severe climatic requirements thanks to its thermal break with 45 mm tubular polyamide strips and the incorporation of reticulated polyolefin both around the glass and between the frame and sash.

FEATURES

Transmittance	Uw ≥ 0.71 (W/m²K)
Acoustic insulation	Rw up to 46 dB
Air permeability	Class 4
Water tightness	Class E1950
Wind resistance	Class C5
Burglar resistance	Grade RC2 (WK2)

CORTIZO

MINIMALIST HANDLE

Simple lines, avant-garde design

Straight aesthetic

Design without escutcheon

Applicable to all European-Groove hinged series, C16 series and PVC

Specific transmission box (In European-Groove)

Hidden screws

8 mm spindle (In European-Groove)

Dimensions 32 x 148 mm

COR 80

Hidden Sash

Elegant design with straight aesthetic in which the sash is concealed behind the frame, thus maximizing the glazed surface and the entry of light. In addition, it offers a great thermal and acoustic performance prompted by the 45 mm thermal break and a glazing capacity of up to 51 mm that allows the installation of triple glazing.

European Groove
Thermally broken

FEATURES	
Transmittance	Uw ≥ 0.71 (W/m²K)

First **invisible handle** on the market

Solution for hidden sash systems **COR 80 HS, COR 70 HS and COR 70 OC**

Dimensions: **27.5 mm (L) x 234 mm (H)**

Ergonomics, robustness and easy handling in opening and closing operations. Totally clean aesthetics that simulate a fixed element, when in fact, it is a side hung or tilt & turn opening.

Exclusive handle integrated within the sash, **imperceptible from a frontal view.**

Possibility of concealed hinges that consolidates the aesthetic purity of the system.

COR 70

Industrial

European Groove
Thermally broken

This 70 mm frame depth hinged system offers great thermal and acoustic performance combined with very simple fabrication, which is why it has become one of the most demanded series for aluminium windows, doors and balconies.

FEATURES

Transmittance	Uw ≥ 0.76 (W/m²K)
Transmittance (Half-Hidden Sash)	Uw ≥ 0.86 (W/m²K)

COR 70

Hidden Sash

It could be a painting, but is a window. This is how we can describe the COR 70 Hidden Sash which, like the 80 mm version, has a sightline of only 66 mm and allows the incorporation of the ARCH INVISIBLE handle, concealed hinges and the drainage solution. Any element that breaks the visual harmony of the ensemble is discarded.

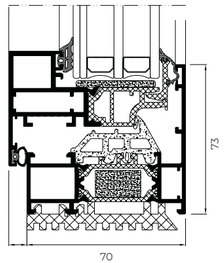
COR **70 HIDDEN SASH**

CONCEALED DRAINAGE SOLUTION



Minimizes the aesthetic impact of the window components.

Compatible with all the 70 mm frame depth systems.

It features a gasket at the bottom of the frame to evacuate the water, replacing the front drainage caps.

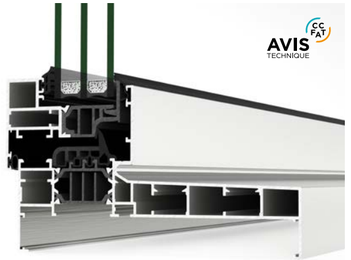
Facilitates window fabrication, allowing to place the base of the frame on the site itself.

COR 70

OC

European Groove
Thermally broken

Hidden sash system oriented to the French market with monoblock frame that makes installation easier. Using this new frame allows faster fabrication and installation, avoiding overlaps, cills and any other complementary profiles, speeding up assembly and fitting. The fabricator can choose either straight or 45 degree cut.



* COR 70 OC - Mitered frame

COR **70 C16 ST**

COR 70

Evolution

Hinged system with groove 16 destined for the industrial production of windows, doors and balconies. In order to reduce the manufacturing period, this new series offers the possibility of using pre-assembled gaskets, assembling cleats and a central floating mullion with a two piece hidden sash, which allows the glazing of double-sash windows on site. COR 70 Evolution is presented in a version of hidden or half-hidden sash with monoblock frames, in straight cut or perimetral, aiming at facilitating the on-site installation.

Hidden Sash C16 ST

16 Grooven
Thermally broken

Hidden sash hinged system compatible with any standard 16 groove hardware. Its attractive design is based on the concealment of the sash behind the frame, reducing the aluminium interlock profile to up to 73.8 mm. Thus achieving a glazed surface that can reach 85% of the totality of the window's glazing, facilitating the entry of light into the rooms. Its avant-garde aesthetic is completed with the possibility of concealing the drainage and hinges.

4900 HI

Sliding

Standard sliding system with hinged features. Offers great thermal and acoustic performance favoured by a glazing capacity of up to 36 mm and a thermal break zone of 34 mm. It has an interlock section of 35 mm and straight lines, allowing the sashes to cross over thanks to the integrated handle with multilock system.

4900 HI SLIDING

4200

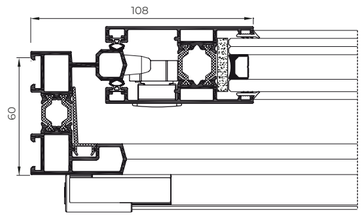
Sliding

Standard sliding system with great versatility and straight or curved aesthetics, 45° or 90° sash encounters and various frames according to each configuration. The 45° and 90° sash encounter version allows the total opening of the span with the pocket possibility solution, completely concealing the sashes in the masonry wall's chamber. Furthermore, this version allows the integration of the solar protection Tamiz system on the same frame.

FEATURES

Transmittance	Uw ≥ 1.5 (W/m²K)
Acoustic insulation	Rw up to 39 dB
Air permeability	Class 3
Water tightness	Class 7A
Wind resistance	Class C5

Reference test 1.20 x 1.20 m / 2 sashes



Sightlines

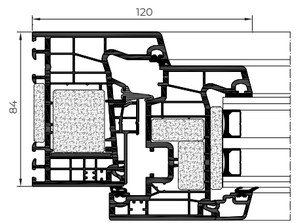
A 84

Passivhaus HI

PVC

Hinged system with 84 mm of frame depth and 6 interior chambers that offers the best thermal performance in the market, with a transmittance value Uw of only 0.66 W/m²K. This series has been certified by the Passivhaus Institute for cool-temperate category (cold and temperate weather), becoming an ideal solution for low energy consumption buildings. It includes special insulating foams in the sash and frame, disposing of the steel reinforcement to increase transmittance. The glass itself acts as a structural element of the window, fixed to the profile by a special adhesive tape.



FEATURES

Transmittance	Uw ≥ 0.66 (W/m²K)
Acoustic insulation	Rw up to 46 dB
Air permeability	Class 4
Water tightness	Class E1500
Wind resistance	Class C5

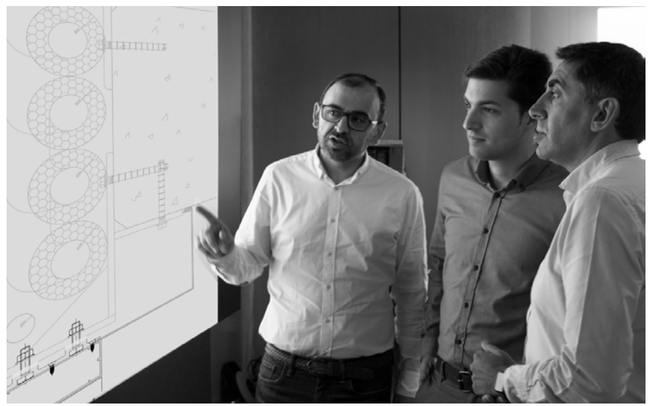
DESIGN

Custom profile development, detail preparation and on-site consultation. Calculation and dimensioning of profiles, fixings, accessories, composite panel and glazing. 3D visualisation and renderings.



FEATURES

The analysis executed in the CORTIZO Technological Centre allow us to test the façades' behaviour when faced with the most extreme conditions, for exemple earthquakes, hurricanes, fires... Additionally, our laboratory also examines the thermal and acoustic performances of all the developed systems, as well as their behaviour in air, water and wind tests.

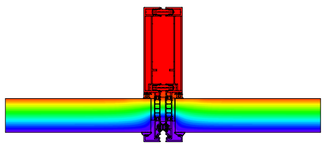
COMPREHENSIVE **ASSISTANCE**

85 engineers provide the necessary technical assistance in each of the project's phases, from the initial design phase, calculations, pricing, as well as the planning and control of deliveries.

UNIT 66

MODULAR FAÇADE

Thermally broken façade system suitable for high rise enclosure projects. This solution combines excellent performance with a wide range of custom designs, offering great aesthetic versatility with option of “glass only” or “seen profile” with an interlock profile of 66 mm. Its fixing bracket has three-dimensional regulation, facilitating its installation.



Maximum weight: 350 kg
Glazing: 58 mm
Interlock profile: 66 mm or 76 m
Thermal break zone:
25 mm - 40 mm
Separation between modules:
10 or 20 mm
Maximum dimensions:

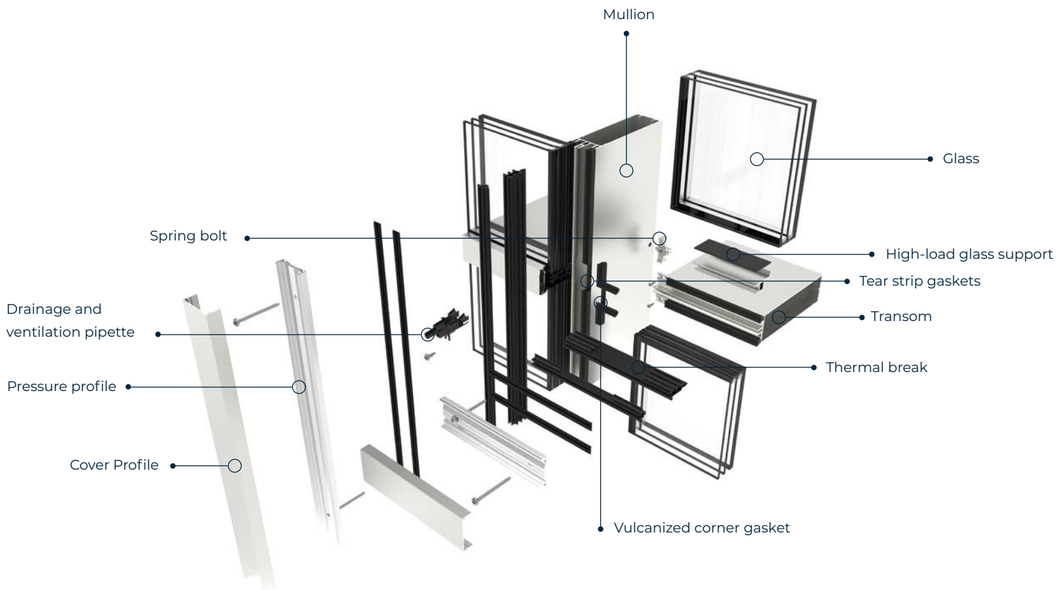
FAÇADES



STICK 62 FAÇADES

CORTIZO extends its stick façades catalogue, adding new versions with mullions and transoms of 62 mm for the systems TP, TPH, TPV and SG. This range of curtain walls uses profiles which offer more inertia and allow the installation of bigger and heavier glasses, improving their fixation against potential movements of the structure. The 62 mm CORTIZO façades also present stronger unions between mullions and transoms, as well as an anchoring designed for tolerating bigger weight and wind loads than the 52 mm versions.

TP 62

SG 62

TPH 62

TPV 62

WATER-TIGHTNESS ELEMENTS

Two plastic accessories are used to guide the water from possible condensation towards the exterior:

Continuity piece

It carries the water that descends from the upper mullion's drainage channels over to the one immediately below in the fillet zone between them.

Pipette

Collects the water from the mullion's (and, generally, from the annexed transoms') drainage channels and expels it into the space between the pressor and the cover, away from the areas that are affected by water tightness. Suitable for the TP 52 and TPV 52 systems.

In order to ensure water tightness in the mullion-transom meeting points, CORTIZO façades offer two solutions:

Tear strip gaskets

Located inside the mullion with a crease that enables partial tearing in the meeting point with the transom, without leaving the union of the horizontal and vertical profile unprotected.

Vulcanized corner gasket

This piece is obtained through moulding, which allows the integration of the gaskets of different mullion and transom thickness and, at the same time, isolates the contact zone of the vertical and horizontal profiles.

Continuity piece

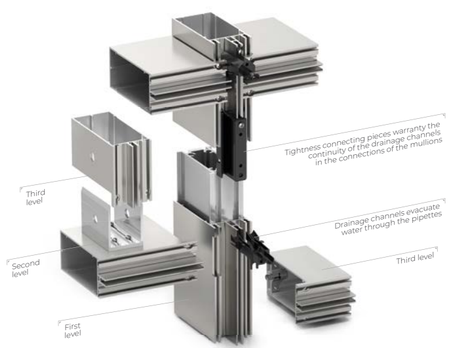
Pipette

Tear strip gaskets

Totally vulcanized corner

DRAINAGE LEVELS

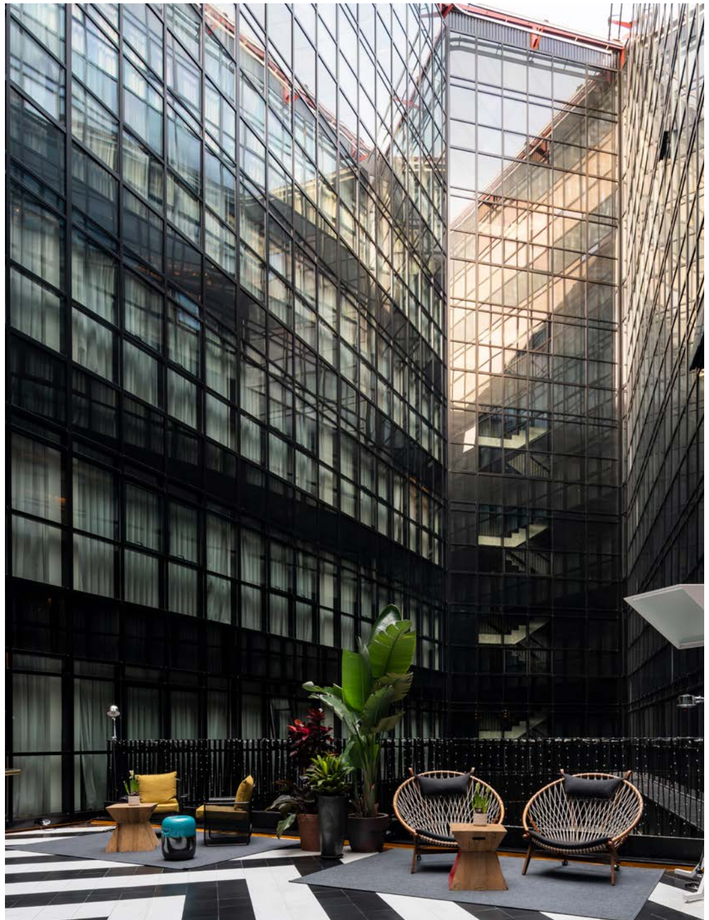
CORTIZO façades have been designed so that the drainage channels of mullions and transoms of different levels are found in different planes. By doing this, the possible condensations will be led from the transoms' outer channels to the mullions and, from there, towards the exterior through the continuity pieces and the pipettes.
These same channels are used, simultaneously, to internally ventilate the four sides of the glass.



ARCH INVISIBLE FACADES

New handle embedded into the profile

Minimalist design invisible from the frontal view.
Available for top hung and parallel openings in the CORTIZO façade systems TP, TPH, TPV, SG of 52 and 62 mm.



TP 52 FAÇADE

TP 52
FAÇADE

Light façade system composed of 52 mm mullions and transoms that form the support structure. The glass is fixed at its four sides by a continuous pressure profile that is externally screwed to the screw ports incorporated in the mullions and transoms, concealing the entire fixing system under an embellishing profile or cover with an interlock profile of 52 mm.

SST 52
FAÇADE

The glass is mechanically fixed to the aluminium frame with an external embellishing profile without the need of structural silicone as is the case in the TP 52 system. It also has an open groove external aesthetic, in this case by covering the glass with aluminium. The EPDM gasket is installed in the perimeter of each module, acting as a water tightness first line of defence. An overlap closes the space between the gaskets.

FEATURES	
Transmittance	Ucw ≥ 0,8 (W/m²K)
Air permeability	Class AE

SST 52 FAÇADE

EQUITY
FAÇADE

This system is characterised by a slim and minimalistic aesthetic with an interlock profile of only 18 mm both in mullions and transoms, which are also the same depth. This creates a flush mounting that provides the façade a uniform aesthetic.
The glazing of this curtain wall is compatible with the TP 52, TPH 52, TPV 52 and SG 52 series.

Transmittance	Ucw ≥ 0,6 (W/m²K)

SLIDING ROOF

Sliding and automatic enclosure system that allows the opening and closing of a roofed area, allowing to enjoy the fresh air or a roofed space depending on the circumstances. This solution grants a 66% maximum opening of the span, featuring, in addition, a notable thermal and acoustic comfort thanks to its glazing capacity of 24 mm and the installation of solar control glass. CORTIZO's Sliding Roof is equipped with a series of complementary profiles that adjust the enclosure's water collection and drainage, thus guaranteeing the system's maximum water tightness.

SHEV

The new SHEV system consists of a structure formed by an enclosure and an integrated motor which facilitates opening and closing. This motor is activated whenever there is a fire so as to enable the natural evacuation of heat and smoke upwardly. Its functions are to improve visibility and reduce the heat in the building, thus decreasing the risk of asphyxiation due to smoke inhalation and facilitating the evacuation of the people inside.

FEATURES

Transmittance	Uw ≥ 0,9 (W/m²K)
Acoustic insulation	Rw up to 44 dB
Reliability	Class Re1000
Opening under snow load	SL 60
Performance at low temperature	T(-5)
Wind load	WL 1200
Resistance to heat	B 300
Aerodynamic free area	According to calculation

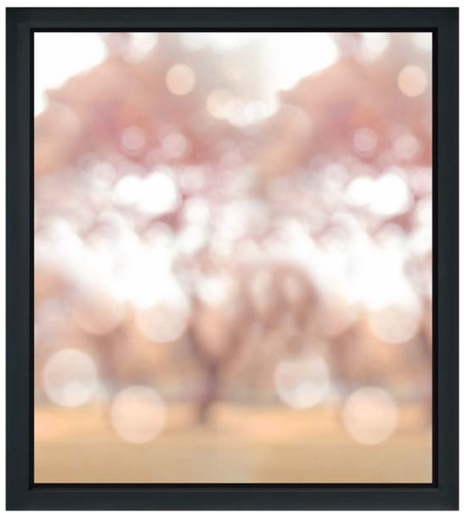
HANDLE WITH KEY

Design with slim backplate
Version for external, internal and PVC assembly
Available in window and door version
Quick setting-up
Available in the full powder-coating range

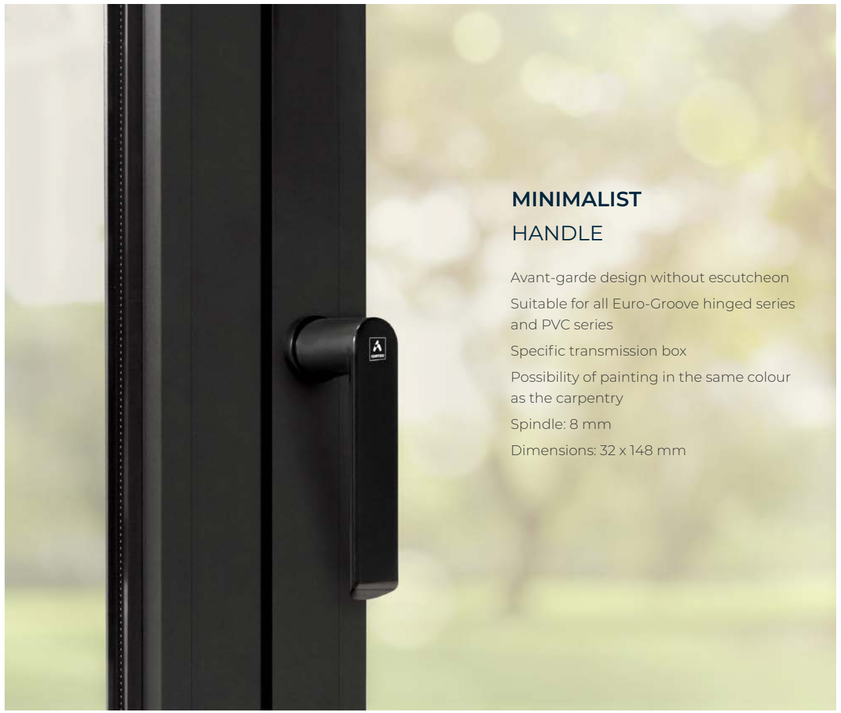
DOOR HANDLE



ARCH INVISIBLE
HANDLE

Exclusive handle integrated within the sash, imperceptible from the frontal view

Compatible with the COR 80 Hidden Sash and COR 70 Hidden Sash systems
Ergonomics, robustness and easy handling in the opening and closing operations
Ideal for combination with concealed hinges, achieving a totally clean aesthetic
Dimensions 27.5 x 234 mm



MINIMALIST
HANDLE

Avant-garde design without escutcheon
Suitable for all Euro-Groove hinged series and PVC series
Specific transmission box
Possibility of painting in the same colour as the carpentry
Spindle: 8 mm
Dimensions: 32 x 148 mm

CORTIZO
HANDLE

Reduced escutcheon design
Adaptability to transmission box and multilock system
Concealed hardware
Spindle: 7 mm
Dimensions 32 x 148 mm

CORTIZO
DOOR HANDLE

Reduced escutcheon design
Opening to the right and to the left versions
Suitable for exterior and interior assembly
Available in door version
Concealed hardware
Spindle: 8 mm
Dimensions 32 x 148 mm

INOX HANDLE

Reduced escutcheon design
Adaptability to transmission box and multilock system
Available in door version
Concealed hardware
Spindle: 7 mm
Dimensions: 31 x 135 mm

SIRIUS
HANDLE

Curved aesthetics
Design with a reduced escutcheon
Suitable for multipoint lock
Available for windows or doors
Spindle: 7 mm
Dimensions: 32 x 155 mm

CORTIZO CREMONE
WITH KEY

Maximum security
3 locking positions: full lock, tilt only and tilt and turn
Dimensions: 33 x 190 mm

REMOVABLE
CORTIZO CREMONE

Easy assembly
Handle clipped on the escutcheon
Possibility of removing the handle in any position
Maximum durability
Dimensions: 33 x 173 mm

ART INFINITY
PULL HANDLE

Suitable for high traffic and large dimension doors
Straight or curved design
Dimensions: 450 x 50 mm

LIFT & SLIDE
HANDLE

Avant-garde aesthetic
Exclusive to systems 4600 and 4700 Lift & Slide
Versions with or without key
Multiple combinations: handle / handle handle / finger pull
Tested to 25,000 cycles
Spindle of 10 mm
Dimensions: 37 x 290 mm

CORTIZO OFFSET
